MYCUR.execute ("SELECT * FROM MEMBER WHERE ACTIVITY= 'GYM'  ")
R=MYCUR.fetchone()
for i in range (2) :

(b) Define the term Degree in relational data model. What is the Degree of the given table PLAYER ?

SECTION – B

(Each question carries 3 marks)

8. • Write the definition of a user defined function **`PushNV(N)`** which accepts a list of strings in the parameter **`N`** and **pushes** all strings which have no vowels present in it, into a list named **`NoVowel`**. 3

• Write a program in Python to input 5 words and **push** them one by one into a list named **`All`**.

The program should then use the function **`PushNV()`** to create a stack of words in the list **`NoVowel`** so that it stores only those words which do not have any vowel present in it, from the list **`All`**. Thereafter, **pop** each word from the list **`NoVowel`** and display the popped word. When the stack is empty display the message **`"EmptyStack"`**.

For example :

If the Words accepted and pushed into the list **`All`** are

```
['DRY', 'LIKE', 'RHYTHM', 'WORK', 'GYM']
```

Then the stack **NoVowel** should store

```
['DRY', 'RHYTHM', 'GYM']
```

And the output should be displayed as

```
GYM RHYTHM DRY EmptyStack
```

OR

- Write the definition of a user defined function **Push3_5(N)** which accepts a list of integers in a parameter **N** and **pushes** all those integers which are **divisible by 3 or divisible by 5** from the list **N** into a list named **Only3_5**.
- Write a program in Python to input 5 integers into a list named **NUM**.

  The program should then use the function **Push 3_5()** to create the stack of the list **Only3_5**. Thereafter **pop** each integer from the list **Only3_5** and display the popped value. When the list is empty, display the message **"StackEmpty"**.

For example :

If the integers input into the list **NUM** are :

```
[10, 6, 14, 18, 30]
```

Then the stack **Only3_5** should store

```
[10, 6, 18, 30]
```

And the output should be displayed as

```
30  18  6  10 StackEmpty
```

9. (i) A SQL table **ITEMS** contains the following columns : 1
